

BIOHEL

BIOHEL

LINSEED OIL

100% linseed oil

- Protects products made of wood or stone
- Protects the substrate in a natural and environmentally-friendly manner
- Not weather-resistant
- Dries slowly

BIOHEL

BIO IMPREGNOL TS 11

Easy maintenance of cutting boards

- A mixture of mineral and vegetable oils for stronger protection
- Excellent for cutting boards and kitchen counters
- Very easy to use
- Water-repellent and odorless

BIOHEL

Natural vegetable oils

Natural vegetable oils BIOHEL are an excellent solution for environmentally-friendly impregnation of wood, as these oil impregnations are completely bio-degradable. You can choose between six different natural oils based on their purpose of use. Wood protection with natural oils emphasize the natural color and beauty of wood; they give wood an additional aesthetic value and warmth. BIOHEL oils penetrate deeply into the wood structure and do not seal the timber, but let it breathe.

BIOHEL

TUNG OIL

Strongest protection
among natural oils

- Protects wooden products, such as dining tables and wooden counters
- Does not turn yellow over time
- Highly water-resistant (in 5-6 layers)
- Silky gloss
- Dries slowly (but faster than linseed oil)

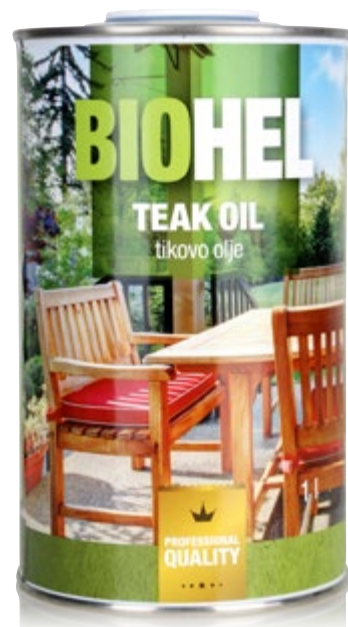

BIOHEL

TEAK OIL

Best choice for
garden furniture

- A mixture of vegetable oils with added solvents for improved penetration
- Pleasant scent
- Water-repellent
- For long-lasting protection we recommend using biocidal impregnation first

BIOHEL

PARAFFIN OIL

Pharmaceutical grade purity

German LFGB certificate
for surfaces in contact with food

- Protects cutting boards and other wooden products
- Used also in wine production to preserve wine against oxidation
- Excellent also for impregnation of wood in saunas
- Colorless, odorless and flavorless

BIOHEL

BIO IMPREGNOL WM

Best choice for you
and your children

EN 71-3 Safety of toys certificate

- Protects indoor wooden furniture, such as wooden closets, tables and beds
- Excellent solution for wooden furniture, including children's furniture
- A pleasant, smooth and waxy feel after application
- Chemically resistant oil
- Dries very quickly
